Alabama Extension to Host First-Time Homebuyer Program in Centreville

BY SAVANNAH LOGAN
REPORTER

For those thinking about buying a home but not quite sure where to start, the Alabama Cooperative Extension System is offering a practical opportunity to learn the process from the ground up. This May, Alabama Extension will host a two-part homeownership program designed to give first-time buyers the tools, knowledge, and confidence to move forward with one of life's biggest decisions.

The program will take place at the BMC Wellness in Centreville on May 21 and May 28, 2026, from 5:30 to 7:30 p.m. each evening. Structured as a step-by-step experience, the sessions are intended to help participants better understand the homebuying

journey from initial planning to making informed financial and real estate decisions.

Rather than overwhelming attendees with industry jargon, the program focuses on clarity and guidance, helping future homeowners feel more prepared and less intimidated by the process.

Whether someone is just beginning to consider buying or is ready to take the next step, the sessions aim to meet participants where they are and move forward at a manageable pace.

The second session on May 28 will feature guest speaker Tom Owings, a seasoned real estate professional with more than 50 years of experience in the industry. As a broker, attorney, and specialist in real estate transactions, invest-

ment properties, and estate planning, Owings brings a depth of knowledge that will offer valuable insight into the legal and practical aspects of purchasing a home.

This program is part of Alabama Extension's continued commitment to providing educational resources that strengthen individuals, families, and communities. By equipping residents with reliable information and guidance, initiatives like this help build confidence and stability for the future.

For those ready to take that first step toward homeownership, or simply learn a little more before making the leap, this is a valuable opportunity to do so in a supportive, local setting.

SWEET HOMEOWNERSHIP ALABAMA
ALABAMA EXTENSION

This step-by-step program gives first-time buyers the clarity, confidence, and expertise to navigate the process and make smart decisions. Move forward with confidence, one step at a time.

May 21st & 28th, 2026
5:30 - 7:30p.m.

BMC Wellness Center
285 Hospital Drive
Centreville, AL 35042

Session Two Guest Speaker - May 28th - 5:30 - 7:30pm

Tom Owings, J.D., CRB, CRS, GRI
President/Broker, REALTOR®

Experienced Real Estate Broker with over 50 years working in the real estate industry. Skilled in Real Estate Sales and Rentals, Investment Properties, Real Estate Transactions, Commercial Real Estate, and Single Family Homes. Strong finance professional with a Juris Doctor focused in Law from Birmingham School of Law and practicing attorney with Owings Law Firm, LLC specializing in real estate matters, wills, probate and estate planning.

The Alabama Cooperative Extension System (Alabama A&M University and Auburn University) is an equal opportunity educator, employer, and provider. If you need a reasonable accommodation or free language access services, contact ACES Human Resources at aceshr@aces.edu or (334) 844-5531.

Free Dual Enrollment Session Highlights Pathway to Stable Nursing Careers

FREE CLASSES including tuition, fees & textbooks

DUAL ENROLLMENT INFORMATIONAL SESSION FOR THE PRACTICAL NURSING PATHWAY

MAY 5, 2026, at 6:00 p.m. | BIBB COUNTY BOARD OF EDUCATION

High school students interested in nursing are invited to attend a Dual Enrollment Information Session for the Practical Nursing Pathway. This session is for students and parents interested in learning how dual enrollment can jump-start a healthcare career while in high school. Attendees will receive important details about the program, admission requirements, and working toward a nursing career. During the session, staff will explain how a student's nursing pathway can be mapped out during high school, including recommended courses and requirements that align with the Practical Nursing program.

Benefits of Attending

- Learn how to start your nursing pathway while still in high school.
- See how your high school and college courses can be mapped out for the Practical Nursing pathway.
- Gain insight into admission requirements and application steps.
- Discover how dual enrollment can save time and college tuition.
- Meet College representatives and program staff.
- Ask questions about career opportunities in nursing and healthcare.
- Explore how Shelton State can help you transition from high school to a nursing career.

Join us to learn how you can take the first step toward a rewarding career in nursing while still in high school.

For more information, visit sheltonstate.edu/dual or email dualenrollment@sheltonstate.edu

BY SAVANNAH LOGAN
REPORTER

In a time when career paths can feel uncertain and constantly shifting, nursing continues to stand out as one of the most stable and dependable professions available. For local students interested in stepping into that field early, an upcoming informational session offers a clear starting point.

Shelton State Community College will host a Dual Enrollment Information Session for the Practical Nursing Pathway on May 5, 2026, at 6:00 p.m. at the Bibb County Board of Education.

The event is open to high school students and their parents who are interested in exploring how a career in healthcare can begin before graduation.

The session will walk

attendees through how dual enrollment works and how it can be used to jump-start a future in nursing. Staff will outline admission requirements, application steps, and how high school coursework can align with college-level classes to create a smooth, intentional pathway into the Practical Nursing program.

One of the biggest advantages of dual enrollment is the opportunity to save both time and money. Through this program, students can begin earning college credit while still in high school, with free classes that include tuition, fees, and textbooks. It's a practical option for families looking to get a head start without adding financial strain.

Beyond logistics, the session will also give

students a broader look at what a career in nursing can offer. Known for its consistency and demand, nursing provides not only job security but also the chance to make a meaningful impact in people's lives every day.

Attendees will have the opportunity to meet college representatives and program staff, ask questions, and better understand how Shelton State can support the transition from high school student to healthcare professional.

For students considering their future, this session offers a straightforward, accessible way to explore a career path that remains steady, essential, and deeply rewarding — no matter how much the world around it changes.

We put you first!

Alabama and Climavision Partner to Close Critical Weather Radar Gaps

LOUISVILLE, KY (April 21, 2026) – Today, the Alabama Emergency Management Agency (AEMA) in partnership with Climavision, the weather technology company whose private radar network and Aldriven forecasting fills visibility gaps across the country, announced a partnership to integrate gap-filling weather radar data into EMA operations across the state to provide more accuracy and lead time during severe weather events. The partnership will provide AEMA and local emergency managers with visibility into weather conditions in regions that were previously unobservable, and therefore vulnerable to unpredictable weather events.

Working in Alabama since 2021, Climavision operates three of its radars in areas historically considered “radar gaps” – or large swathes of land where lower atmospheric regions aren’t observed at all.

Emergency managers across the state will now have access to data from these radars so they can respond to critical weather events in regions they once couldn’t monitor. The initiative reflects a growing approach among states seeking to modernize situational awareness through public-private collaboration without assuming the cost or complexity of owning and operating radar infrastructure.

The National Weather Service (NWS) relies on its nationwide NEXRAD radar

network to provide the backbone of U.S. weather forecasting and situational awareness. While NEXRAD delivers critical upper-level coverage, many regions, including parts of Alabama, remain underserved at lower altitudes where severe weather impacts communities most directly. Approximately 130 million U.S. citizens live in visibility gaps where weather conditions close to the ground aren’t measured by existing NEXRAD radars.

State and local emergency managers in many areas have historically been forced to rely on distant radar coverage, limiting their ability to assess rapidly evolving threats in their own jurisdictions. In the last three years, Climavision has worked collaboratively with NWS to provide data that addresses these gaps.

Like Alabama, many states are looking to fill them through public-private partnerships that provide a cost-effective, efficient way to shorten radar installation timelines and cover burdensome costs, such as ongoing infrastructure maintenance.

In Alabama specifically, Climavision’s radars fill gaps across one of America’s most widely recognized

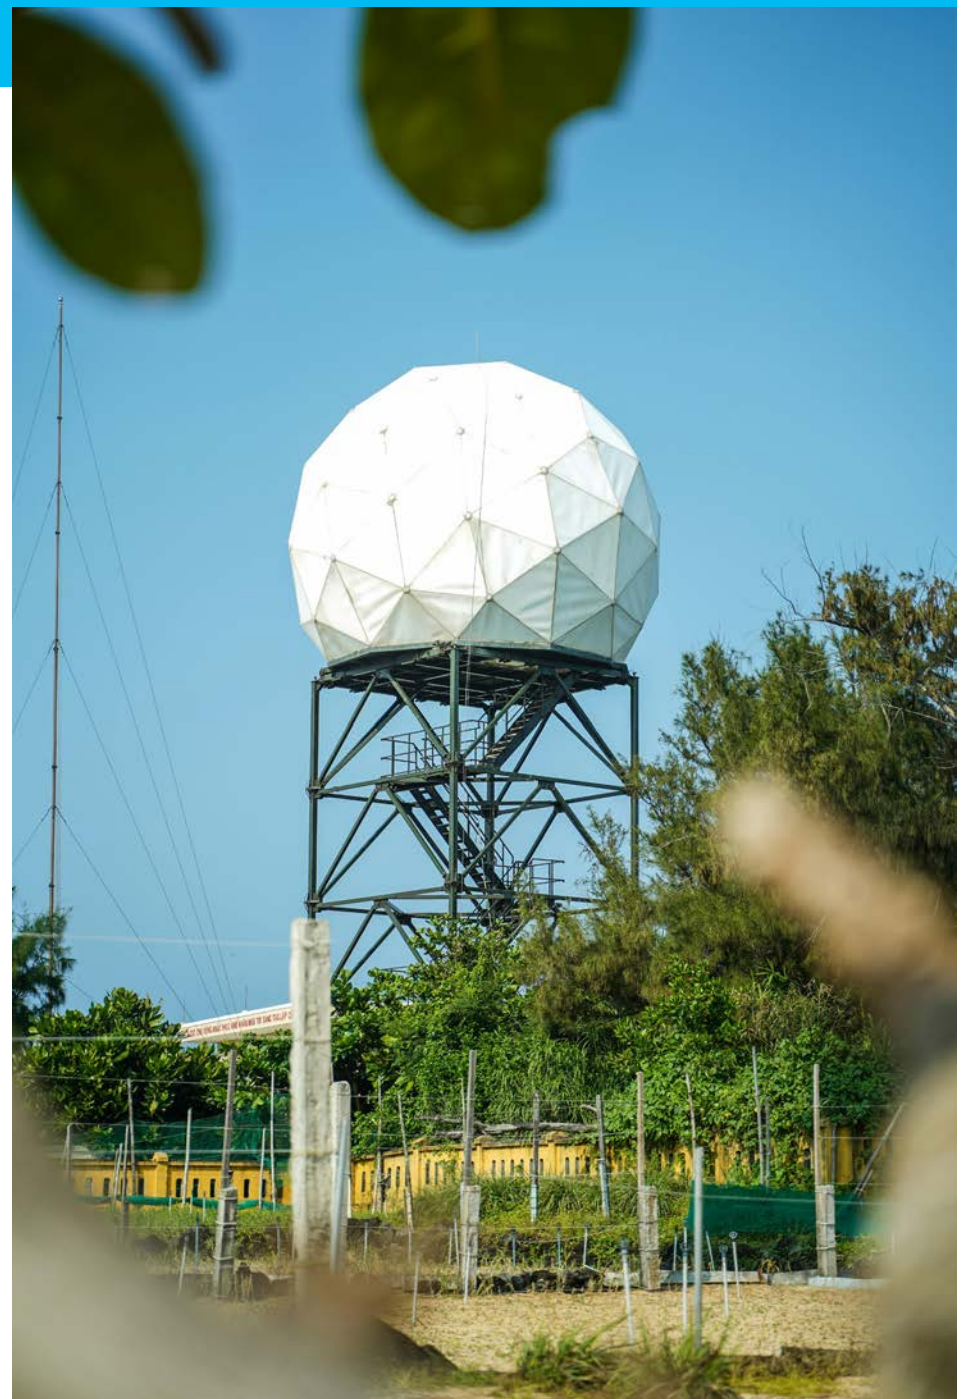

observational gaps in the southwest portion of the state, an area particularly vulnerable to severe weather but historically lacking hyper-local radar coverage. Previously, access to radar data was limited to the

local counties where the systems were deployed. Through this statewide integration, those insights are now available to AEMA, informing the allocation of public safety resources, operational coordination, and communication with vulnerable populations across Alabama.

“Our responsibility is to ensure every community in Alabama—urban and rural—has access to the same level of situational awareness when severe weather threatens,” said Jeff Smitherman, Director of the Alabama Emergency Management Agency. “Closing coverage gaps takes partnership across federal, state, county, and private-sector teams, and this approach allows us to do that in a way that is both collaborative and fiscally responsible.”

Climavision operates under a service-based model that addresses the limitations of ad hoc gap-filling efforts. The company owns, operates, and maintains its radar systems, working with local and state partners to strategically site installations. Supplemental radar observations are integrated into existing forecasting and emergency management workflows, allowing agencies to enhance situational awareness.

“Weather planning and response requires tight communication and coordination with federal, state, and local partners,” said Tara Leigh Goode, Climavision’s Head of Radar Operations and Strategic Partnerships.

“This exciting partnership with AEMA demonstrates how we can all work together to accelerate innovation and solutions in the interest of a safer, more resilient nation. We’re grateful to AEMA for their leadership in disaster preparedness and proud to partner with them.”

“The first phase of this effort focused on deploying the physical infrastructure needed to observe weather where it previously couldn’t be seen,” said Chris Goode, Co-Founder and CEO of Climavision.

“This next phase — making that data accessible statewide — shows how states can responsibly modernize their weather readiness. Alabama’s approach demonstrates what’s possible when state leadership, local partners, and federal systems work together, and we expect this model to become increasingly relevant as weather risks continue to intensify.”

With an optimal range of 60 miles and up to 10x the resolution of standard NEXRAD S-band radars, Climavision ra-

dar systems provide high-fidelity observations critical for severe weather monitoring. In addition to Alabama, Climavision’s network fills visibility gaps in 13 other states: Arkansas, Georgia, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, North Carolina, Oklahoma, Kansas, Pennsylvania, Tennessee, and Texas. The company will expand to Florida this year. All radar systems are safe and licensed by the Federal Communications Commission (FCC).

Bibb County Education Retiree's Association April Meeting

The Bibb County Education Retiree's Association had their April meeting at the Bibb Wellness Center. Regional Director Icie Wriley attended the meeting and Michelle Giddens from the Bibb County Extension presented the program on gardening

in small spaces. For the service project for April, club members brought cooking utensils and items needed by "A Cup of Joy" coffee shop at the Brent/Centreville Library. The program is a community based work experience for students with disabilities to sup-

port job development and employment opportunities post high school. Attendees were: Icie Wriley, District Director; Barbara Smith, Avis Huey, Fran Kornegay, Mary Beth Sansing, Donna Cook, Vickie Brown and Michelle Giddens.

WBMS Softball

The West Blocton Middle School's softball roster for this season included Kailynn Smith, Zillie Bush, Ava Pierson, Cayden Odom, Ayla Bates, Dezaray Davis, Crimson Jennings, Ava Shadwick, Kelsie Fortenberry, Arayleigh Lewis, Ava Herndon, Harper Lawley, Maddie Zavala, Aubree Martin, Molly Canterbury, Khloe Barrett, and Haven Ashley.

Under the leadership of coaches Chloe Robertson, Melinda Jennings, and Jonathan Jennings, this young team showed tremendous growth from start to finish. Their development over the course of the season highlighted both their dedication and potential. Coach Robertson expressed how much she values this group, noting that it will be difficult to see the 8th graders move on, but

excited to see them do big things in high school.

Crimson Jennings led the team offensively with an outstanding .525 batting average, followed by Kailynn Smith with an impressive .378. Both players demonstrated strong leadership on the field and made significant contributions on both offense and defense throughout the season.

A special recognition was also given to Molly Canterbury, who worked tirelessly as the team's starting pitcher. Canterbury appeared in 15 games this season, playing a key role in the team's performance.

Coach Robertson shared that she is so proud of every single player this season for their hard work, perseverance, and determination. Our team is very young and we

even had a few girls that had never played before, but by the end of season you would have never guessed that. I am so proud of them for going out of their comfort zone this year and trying something new in 7th grade. There are not many people that would do that, and I am so thankful that they did. The team looks forward to next season as the current 7th graders step into leadership roles.

The team closed out the season on a high note with a 8-6 victory over Bibb. Following the win, players celebrated together at THE BLOC with pizza and Ice Cream. It is not about how you start but about how you finish. The coaches stated that they are so proud of this team for working hard all season and for never giving up.

Alabama Arise on state grocery tax holiday: 'Two months is a good start toward forever'

A one-time, two-month holiday on Alabama's state sales tax on groceries began May 1. HB 527 by Rep. James Lomax, R-Huntsville, will reduce the state grocery tax from 2% to 0% starting May 1 and continuing through June 30. The state grocery tax rate will return to 2% on July 1.

Alabama Arise executive director Robyn Hyden released the following statement Friday about the law's implementation and what should happen next:

"Two months is a good start toward forever. Eliminating the state grocery tax – even temporarily – will make it easier for every Alabamian to make ends meet, especially in this time of persistently high food prices. People who are struggling to make ends meet will benefit the most of all.

"The grocery tax is a cruel tax on survival. It drives many families deeper into poverty, and Alabama Arise remains committed to the goal of eliminating it entirely. Arise members from every corner of our state have advocated tirelessly for Alabama to untax groceries. And our work will continue until the state grocery tax is a thing

of the past.

What should happen next

"The state grocery tax reductions in 2023 and 2025 were essential steps toward tax justice. But Alabama still remains one of nine states taxing groceries, and our legislators should commit to removing our state from that shameful list once and for all.

"As we work to untax groceries, we also must protect funding for our children's education. Lawmakers should work together to end the state grocery tax sustainably and responsibly without harming Education Trust Fund revenues.

"Arise is open to numerous ideas for replacement revenue. We continue to support our longstanding proposal to replace grocery tax revenue by capping or ending the state income tax deduction for federal income tax payments. Alabama is the only state to allow this full deduction, which overwhelmingly benefits the wealthiest households. Closing this loophole would protect funding for public schools and ensure Alabama can afford to end the state sales tax on groceries forever."

Barfoot and Hatcher Outsmart Federal Courts

Inside the Statehouse
By Steve Flowers

May 6, 2026:

A couple of years ago, Democratic Party legal groups found a sympathetic federal panel in the Northern District of Alabama, and that court created a new minority Democratic Congressional District. That district came into existence a little over a year ago.

The Constitution grants the power to draw and determine Congressional and Legislative districts to legislatures in each state. Our duly elected Alabama Legislature had created, for several decades, districts that yielded six Republicans and one Democrat.

Using the auspices of the 1965 Voting Rights Act, the federal court ruled, and then drew new maps that led to a new Congressional Democratic district. That seat is now held by Mobile Democrat Shomari Figures. Our delegation now has five Republicans and two Democrats.

Having had success with congressional realignment, these same Democratic legal groups focused on the Alabama State Senate. Again, they were successful with the same Federal Judge, however, with a limited focus. The Court zeroed in on the Montgomery River Region. This Republican district of Senator Will Barfoot was comprised of the white areas of east Montgomery, Pike Road, along with Crenshaw and Elmore counties. After the interventionist decision by the same Federal Judge that changed Alabama's Congressional lines, the jurist commenced, again, to redraw the lines.

The court dissolved the Barfoot Senate District 25 and created a new Democratic Montgomery-based State Senate district, combining the former River Region district with areas where there was burgeoning growth of the black population of Montgomery. Currently, the area has two very competent, diligent, and popular State Senators. However, the drafter made Democrat Hatcher's District 26 a winnable Republican district and made Barfoot's District 25 a very likely Democratic district.

After a month or so of mulling over the new lines, Barfoot and Hatcher, who get along well together and work well together representing Montgomery, said, "why don't we just swap Senate district numbers?"

Senator Will Barfoot initiated the maneuver. He studied it and ran it by several folks and political powers, and everybody told him, "That dog will hunt." When Hatcher contemplated the plan, the amicable, pragmatic Democrat

had no problem changing his Senate district number from 26 to 25. After all, the ruling had moved most of his constituents to the

new District 25 anyway. Furthermore, these voters do not care what the district number is, they just know Hatcher is who they want as their State Senator.

Senator Will Barfoot made one of the boldest and shrewdest moves seen in Alabama politics in a long time. Barfoot outwitted the Federal Judge and turned the tables on her, saving a Republican Seat in the State Senate and in turn, saving and preserving Hatcher's familiar Democratic district. Barfoot and Hatcher did what you call "making lemonade out of lemons." The people of that area will have continuity and selfless public servants with Hatcher and Barfoot representing them in the Alabama State Senate.

Senator Barfoot's statement in announcing the changing of State Senate numbers was one of the most succinct and accurate summations I have ever seen or heard. Barfoot, the Chairman of the Senate Judiciary Committee, said he is running for reelection to the Senate from Seat 25 to Seat 26 because the Court ruling "makes no sense."

Barfoot went on to add, "I cannot allow one of the most conservative counties in Alabama – Elmore County – to be denied the conservative representation it deserves simply because Federal Courts issued a badly flawed ruling. Allowing a Democrat to represent Elmore County in the Alabama State Senate would be like Bernie Sanders representing Alabama in the U.S. Senate and casting liberal votes that do not reflect the views of the citizens they swore an oath to serve. When that happens, grassroots voices are silenced, and conservative views are ignored. I'm running in District 26 to ensure that conservative Republicans in Elmore County and throughout the area are represented by a conservative Trump Republican and not a woke liberal Democrat who fights against everything they believe and embrace."

The new district lines that were dictated from the Federal Judge were drawn by an untrained 18-year-old college freshman Democrat, who used an online app and submitted the map to the Courts for consideration.

This novice mistake allowed Will Barfoot and Kirk Hatcher outsmarted the Federal Courts and made lemonade out of lemons.

See you next week.

"A Mighty Fortress Is Our God"

Few hymns carry both the weight of history and the power of conviction quite like A Mighty Fortress Is Our God. Written by Martin Luther during the height of the Protestant Reformation, this hymn stands as both a declaration of faith and a reflection of a turbulent time in church history.

Luther, widely known for challenging the practices of the Catholic Church, believed deeply in a personal relationship with God — one not dependent on intermediaries. While his writings and teachings reshaped theology, his influence extended just as powerfully into music. Luther viewed music as a gift from God, something that could strengthen faith, drive out fear, and unite believers. He even insisted that those who taught God's people should understand the power of sacred song.

Out of that conviction, Luther began writing hymns that congregations could sing for themselves.

A Mighty Fortress Is Our God, written between 1527 and 1529, emerged during one of the darkest and most dangerous periods of the Reformation, when persecution was widespread. Its bold, unwavering lyrics offered comfort and courage, reminding believers of God's strength in the face of fear. It quickly became known as "The Battle Hymn of the Reformation."

Musically, there is some debate about whether Luther composed the tune himself or adapted it from an existing melody. Regardless, his influence is unmistakable. A skilled musician who played both the lute and flute, Luther helped shape a new era of congregational singing that made worship more accessible and personal.

Originally written in German, the hymn has since been translated into many languages, with several English versions gaining popularity over time. Despite differences in wording, the message remains the same: God is a steadfast refuge.

Centuries later, A Mighty Fortress Is Our God continues to echo through churches around the world — a lasting reminder of faith that stands firm, even in the midst of struggle.

BIBB MEDICAL CENTER IS CURRENTLY SEEKING:

Med-Surg Registered Nurses

Full-Time and Part-Time Positions Available

The Hospital Registered Nurse at Bibb Medical Center plays a critical role in delivering comprehensive nursing care to patients recovering from surgery or managing acute medical conditions. This position requires the nurse to assess patient health status, develop and implement individualized care plans, and monitor patient progress to ensure optimal recovery outcomes. The nurse collaborates closely with multidisciplinary healthcare teams to coordinate treatments, administer medications, and provide patient education. A key outcome of this role is to promote patient safety, comfort, and well-being while facilitating efficient hospital operations. Ultimately, the Med-Surg RN contributes to improving patient satisfaction and clinical results through compassionate, evidence-based nursing practice.

MOTHER'S DAY SPECIAL

A Few Simple Ways to Make Mom Feel Truly Loved This Mother's Day

BY SAVANNAH LOGAN
REPORTER

Mother's Day has a way of sneaking up on people. One minute it's April, the next you're standing in a card aisle hoping something halfway decent hasn't already been picked over. But underneath the flowers and last-minute plans, the goal is pretty simple: make her feel seen, appreciated, and maybe a little spoiled in a way she usually doesn't allow for herself.

The good news is, it doesn't take a grand production to do that well. It just takes a little intention.

Start with your time. Real time. The kind where you're not checking your phone every few minutes or mentally running through your to-do list. Sit with her, talk with her, take

her somewhere she enjoys, or just slow down long enough to actually be present. It's a small shift, but it carries a lot of weight.

Next, lighten her load for the day. Pay attention to the things she usually takes care of and quietly handle them yourself. Whether it's cooking, cleaning, or running errands, stepping in without being asked says more than any gift ever could. And if you manage to do it without asking a dozen questions along the way, even better.

It's also worth putting something in writing. It doesn't have to be long or overly polished, just sincere. A few honest sentences about what she means to you or what you've learned from her can become something she holds onto far longer than anything store-bought.

Try to shape the day around what she actually enjoys. Some moms love a full day out, others would much rather keep things quiet and simple. Paying attention to that detail shows that you're thinking about her as a person, not just checking a box on the calendar.

And finally, take a moment to really check in. Ask how she's doing, beyond the usual "I'm fine."

Mothers and mother figures often carry more than they let on, and giving them space to be cared for, even briefly, matters.

At the end of the day, it's not about getting everything perfect. It's about making sure she knows, in a genuine and thoughtful way, that she's loved — not just today, but every day you remember to show it.

About This Poem

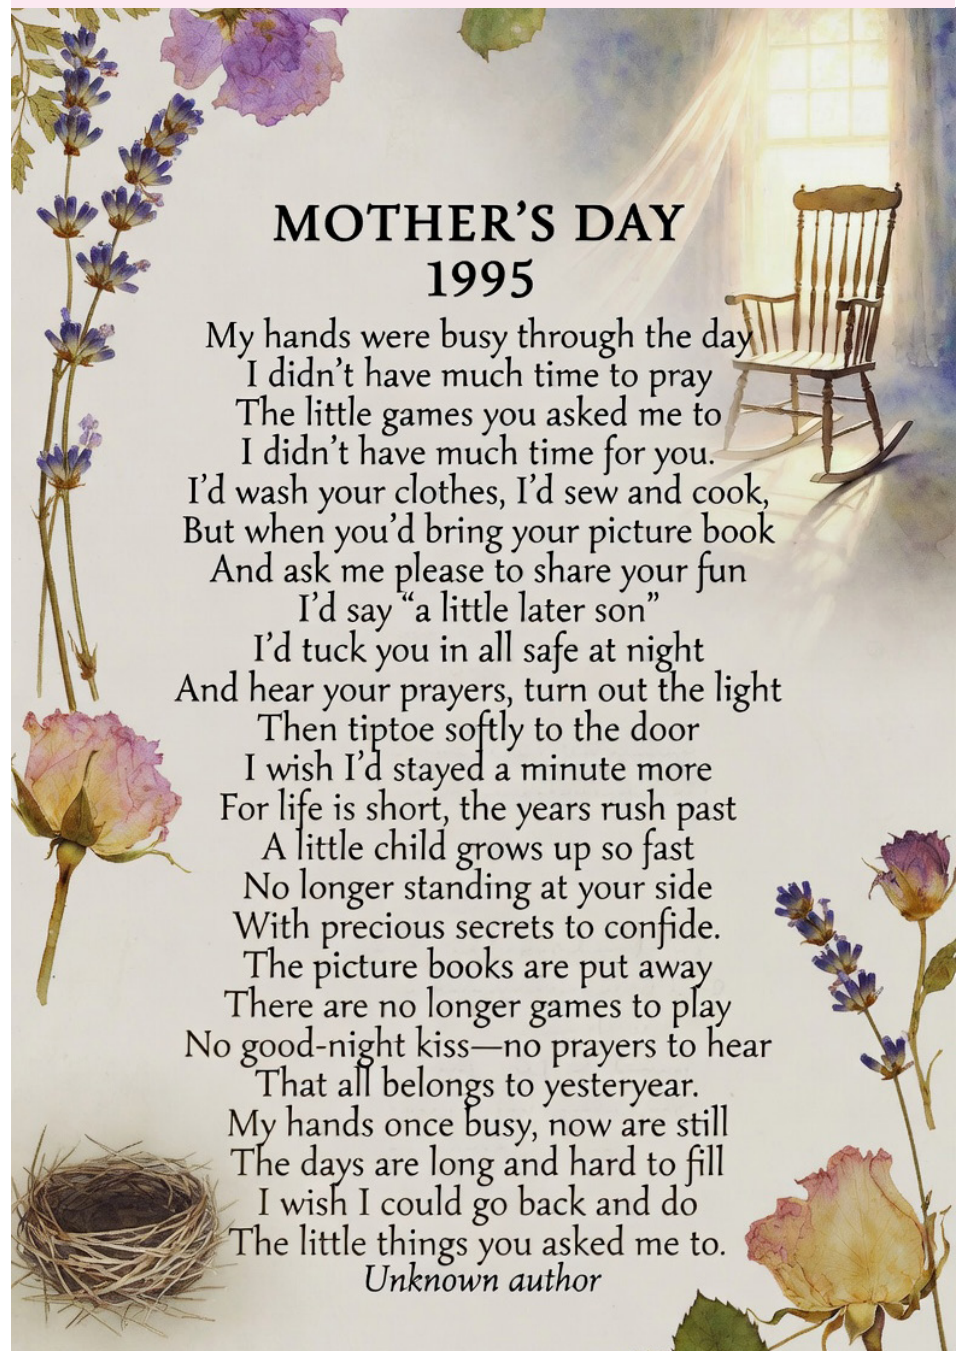

This poem was taken from a handwritten message to the children of Mrs. George B. Vernon Jr. (1918-2012) and offered to the Press for publication. Her well known children include George, Rosalind, Mark, Joseph, Philip, Stephen, Ruth & Rachel

This poem has been widely shared for many years in church bulletins, greeting cards, and online posts. It is often attributed to Helen Steiner Rice, a well-known writer of

inspirational verse.

However, no verified source has been found linking this poem to her published works. Because of that, the poem is best regarded as anonymous, with the attribution to Rice considered a common but unconfirmed association.

Like many sentimental poems passed from hand to hand, its exact origin has been lost over time—but its message continues to resonate with readers.

MOTHER'S DAY 1995

My hands were busy through the day
I didn't have much time to pray
The little games you asked me to
I didn't have much time for you.
I'd wash your clothes, I'd sew and cook,
But when you'd bring your picture book
And ask me please to share your fun
I'd say "a little later son"
I'd tuck you in all safe at night
And hear your prayers, turn out the light
Then tiptoe softly to the door
I wish I'd stayed a minute more
For life is short, the years rush past
A little child grows up so fast
No longer standing at your side
With precious secrets to confide.
The picture books are put away
There are no longer games to play
No good-night kiss—no prayers to hear
That all belongs to yesteryear.
My hands once busy, now are still
The days are long and hard to fill
I wish I could go back and do
The little things you asked me to.

BMC Wellness Center Invites Community to Celebrate Mother's Day

BY CANDACE JOHNSON
REPORTER

BMC Wellness Center is preparing to celebrate Mother's Day with a special opportunity for the community to get involved.

Community members can honor their mothers or loved ones by sending a floral arrangement through Cahaba Flowers, while also supporting a local small business.

The center is also inviting local churches,

businesses, organizations, and individuals to "Sponsor a Mom." Those interested can contact the activities department to help make the holiday extra meaningful for residents.

In addition to Mother's Day celebrations, BMC Wellness Center will host a Ladies Day event on May 20. The event will feature arts and crafts, shopping, and health information for attendees.

NEWS SPECIAL

2026 Annual Drinking Water Quality Report (Testing Performed January through December 2025)

CITY OF CENTREVILLE WATER AND SEWER BOARD
 PWSID AL000092
 1270 Walnut Street
 Centreville, AL 35042

Office hours: 8-5 Monday through Friday
 Phone (205) 713-8886
 Emergency Phone (205) 928-4258

We are pleased to present to you this year's Annual Water Quality Report. This report includes important information on our water sources, results of water analyses, plain language definitions, and other important information about water and health. We work diligently to provide high quality water that meets or exceeds State and Federal drinking water standards.

Number of Customers	Approximately 2007		
Water Sources	3 groundwater wells: 2 wells (Chepultepec & Copper Ridge dolomite aquifers) are located east of town off Hwy 82 and 1 well (Knox aquifer) is located on Lightsey Rd.		
Interconnections	Connection with Perry County Water Authority, City of Brent, & Randolph Water Authority for emergency use		
Water Treatment	Chlorination for disinfection		
Storage Capacity	5 tanks with a total capacity of 1,650,800 gallons		
Staff	Larry Oikle, Superintendent	Board Members	Josh Colburn, Chairman
	Nick Henry, Asst. Superintendent		Linda Lawrence, Member
	Megan Batte, Clerk/Secretary/Treasurer		Jimmy Martin, Member
	Morgan Jones, Asst. Clerk		Seth Young, Member
	Bryan Mobley, Distribution System Operator		Barry Cooner, Member
	Tom Ogletree, Maintenance	Board Meetings	2 nd Monday of each month at City Hall at 4:30 p.m.
	Ronnie Rutledge, Maintenance		
	Jeff Philips, Maintenance		
	Jared Huffman, Maintenance		

Source Water Protection

In compliance with the Alabama Department of Environmental Management (ADEM), City of Centreville Water and Sewer Board has developed a Wellhead Protection Plan that assists in protecting our water sources. This plan provides information such as potential sources of contamination. It includes a susceptibility analysis, which classifies potential contaminants as high, moderate, or non-susceptible to contaminating the water source. There were 63 potential contaminants identified within our assessment area, and all were ranked low. The assessment was performed, public notification was completed, and the plan was approved by ADEM. A copy of the report is available in our office for review during regular business hours with prior request.

We routinely perform water storage facility inspections, and we utilize a Bacteriological Monitoring Plan. Chlorine residual is monitored closely within the distribution system. We have adopted a Cross-Connection Control Program for the purpose of detecting and preventing a danger to public health from cross-connection contamination.

Please help us make these efforts worthwhile by doing your part to help protect our source water. Carefully follow instructions on pesticides and herbicides you use for your lawn and garden, and properly dispose of household chemicals, paints, and waste oil.

Health Information about Lead

As required by ADEM, we conducted a Lead Service Line Inventory during 2024, and it was confirmed that our system contains no Lead service lines, nor was there any historical record of Lead lines ever existing in the system. The Lead Service Line Inventory report and results from our latest Lead results are available for review in our office upon request.

Our water is treated for corrosion control with pH adjustment and a corrosion inhibitor, and corrosion monitoring is conducted continuously. We perform lead and copper testing on samples collected within the distribution system every three years as assigned by ADEM. An outside laboratory analyzes the samples, and results have always been well below the MCL. You may view the results in our office upon request. If you have any questions about our lead sampling results, contact us at 205-713-8886.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney, or nervous system problems.

Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Warrior River Water Authority is responsible for providing high quality drinking water, but cannot control the variety of materials used in household plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your kitchen sink tap for 30 seconds to 2 minutes before using water for drinking or cooking, especially if the water has been sitting undisturbed for several hours, as in overnight. In all situations, especially for making baby formula, drink or cook only with water that

comes out of the cold tap. Warm or hot tap water is more likely to cause lead to leach from plumbing materials. Periodically remove the aerator on the tip of the faucet and wash out any debris such as metal particles. Remember - *Boiling will NOT reduce the amount of lead in your water.*

The recommendations above are likely to be effective in reducing lead levels because most of the lead in household water usually comes from the plumbing in your house. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize your family's exposure is available from www.epa.gov/safewater/lead or by calling the EPA Safe Drinking Water Hotline at 1-800-426-4791. Water systems are required to sample for lead in schools and licensed child care facilities as requested by the facility. Contact your school or child care facility for further information about potential sampling results.

General Drinking Water Information

All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. MCL's, defined in a List of Definitions in this report, are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect. In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the levels of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and radioactive material, and it can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water run-off, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, storm water run-off, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

If you are concerned about radon in your home consider having the home tested. Testing is easy and inexpensive. Compared to radon entering the home through soil, radon entering the home through tap water will, in most cases, be a small source of radon in indoor air. For more information call EPA's Radon Hotline at (800-SOS-RADON). *Note: public water systems in Alabama are not generally required to routinely monitor for radon in drinking water under current federal or state regulations.*

Some people may be more vulnerable to contaminants in drinking water than the general population. People who are immunocompromised such as cancer patients undergoing chemotherapy, organ transplant recipients, HIV/AIDS positive or other immune system disorders, some elderly, and infants can be particularly at risk from infections. People at risk should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791). Based on a study conducted by ADEM with the approval of the EPA a statewide waiver for the monitoring of asbestos and dioxin was issued. Thus, monitoring for these contaminants was not required.

Questions?

If you have any questions about this report or concerning your water utility, please call the water office at 205-926-9561. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the second Monday of each month at City Hall at 4:30 p.m.

More information about contaminants to drinking water and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (1-800-426-4791).

NEWS SPECIAL

Monitoring Schedule and Results

We routinely monitor your drinking water for contaminants in your drinking water according to Federal and State regulations, using EPA-approved methods and a State certified laboratory. The Alabama Department of Environmental Management (ADEM) allows us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. The following table shows the most recent year of monitoring for these contaminant groups.

Based on a study conducted by ADEM with the approval of the EPA a statewide waiver for the monitoring of asbestos and dioxin was issued. Thus, monitoring for these contaminants was not required.

Constituent Monitored	Date Monitored
Inorganic Contaminants	2025
Lead/Copper	2023
Microbiological Contaminants	monthly
Nitrates	2025
Radioactive Contaminants	2025
Synthetic Organic Contaminants (including pesticides and herbicides)	2024
Volatile Organic Contaminants	2025
Disinfection By-products	2025
Unregulated Contaminant Monitoring Rule 2 (UCMR2) contaminants	2009
PFAS Contaminants	2020

As you can see by the table below, our system had no MCL violations. We have learned through our monitoring and testing that some constituents have been detected.

TABLE OF DETECTED DRINKING WATER CONTAMINANTS						
Contaminants	Violation Y/N	Level Detected	Unit Msmt	MCLG	MCL	Likely Source of Contamination
Alpha emitters	NO	Total 6.68 (Avg. 1.67)	PCi/l	0	15	Erosion of natural deposits
Radium 228	NO	Total 2.17 (Avg. 0.54)	PCi/l	0	5	Erosion of natural deposits
Barium	NO	0.06	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Copper	NO	0.082 ² (0.0049-0.13)	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead	NO	ND-0.0012	ppm	0	AL=0.015	Corrosion of household plumbing systems, erosion of natural deposits
Nitrate (as Nitrogen)	NO	0.22-0.37	ppm	10	10	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
TTHM - Total trihalomethanes	NO	Annual ND-7.5	ppb	0	80	By-product of drinking water chlorination
HAA5 - Haloacetic Acids	NO	Annual ND-1.2	ppb	0	60	By-product of drinking water chlorination
Secondary Contaminants						
Hardness	NO	131-133	ppm	n/a	n/a	Naturally occurring in the environment or as a result of treatment with water additives
pH	NO	7.0-7.1	S.U.	n/a	n/a	Naturally occurring in the environment or as a result of treatment with water additives
Sodium	NO	2.1	ppm	n/a	n/a	Naturally occurring in the environment
Total Dissolved Solids	NO	142	ppm	n/a	500	Naturally occurring in the environment or from industrial discharge or agricultural runoff

¹ Figure shown is 90th percentile from latest round of sampling, and none of the sample sites exceeded the Action Level (AL).

PFAS Contaminants: Below is a list of PFAS contaminants for which our system monitored in 2020 and the results of that monitoring. Note: PFAS was not detected in our drinking water. For more information on PFAS contaminants, please refer to www.epa.gov/pfas.

PFAS Contaminants (ppb)									
Abbreviation	Contaminant	MCLG	MCL	Detected	Abbreviation	Contaminant	MCLG	MCL	Detected
11Cl:PF3OUdS	11-chloroicosafluoro-3-oxadecane-1-sulfonic acid	--	--	ND	PFDoA	Perfluorododecanoic acid	--	--	ND
9Cl:PF3ONS	9-chlorohexadecafluoro-3-oxanone-1-sulfonic acid	--	--	ND	PFIpA	Perfluoroheptanoic acid	--	--	ND
ADONA	4,8-dioxo-3H-perfluorononanoic acid	--	--	ND	PFHxS	Perfluorohexanesulfonic acid	0.010	0.010	ND
HFPO-DA	Hexafluoropropylene oxide dimer acidA	0.010	0.010	ND	PFNA	Perfluorononanoic acid	0.010	0.010	ND
NEFOSAA	N-ethylperfluorooctanesulfonamidoacetic acid	--	--	ND	PFOS	Perfluorooctanesulfonic acid	0	0.004	ND
NMeFOSAA	N-methylperfluorooctanesulfonamidoacetic acid	--	--	ND	PFOA	Perfluorooctanoic acid	0	0.004	ND
PFBS	Perfluorobutanesulfonic acid	--	--	ND	PFTrDA	Perfluorotridecanoic acid	--	--	ND
PFDA	Perfluorodecanoic acid	--	--	ND	PFTriDA	Perfluorotridecanoic acid	--	--	ND
PFHxA	Perfluorohexanoic acid	--	--	ND	PFUnA	Perfluoroundecanoic acid	--	--	ND

Plain Language Definitions

This report may contain words or phrases that are unfamiliar to you. The following section is used to define or explain them:

- Action Level:** the concentration of a contaminant that, if exceeded, triggers treatment or other requirements.
- Coliform Absent (ca):** laboratory analysis indicates that the contaminant is not present.
- Detected contaminant:** any regulated or unregulated contaminant detected at or above its method detection limit (or reportable limit)
- Disinfection byproducts (DBPs):** formed when disinfectants react with bromide and/or natural organic matter (i.e., decaying vegetation) present in the source water.
- Hazard Index (HI):** used to determine health concerns associated with mixtures of certain PFAS in finished drinking water. An HI greater than 1 requires a system to take action.
- Locational Running Annual Average (LRAA) –** yearly average of all the DPB results at each specific sampling site
- Maximum Contaminant Level (MCL):** highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- Maximum Contaminant Level Goal (MCLG):** the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- Maximum Residual Disinfectant Level (MRDL):** highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- Maximum Residual Disinfectant Level Goal (MRDLG):** The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- Micrograms per liter (ug/L):** equivalent to parts per billion (ppb) since one liter of water is equal in weight to one billion micrograms.
- Microsiemens per centimeter (µs/cm):** unit of measurement for Specific Conductance.
- Milligrams per liter (mg/L):** equivalent to parts per million
- Million fibers per liter (MFL):**
- Millirems per year (mrem/yr):** a measure of radiation absorbed by the body.
- Nephelometric Turbidity Unit (NTU):** a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.
- 90th Percentile:** The values reported for lead and copper represent the 90th percentile. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below it. The 90th percentile is equal to or greater than 90% of the lead and copper values detected at your water system.
- Not Detected (ND):** laboratory analysis indicates that the constituent is not present above detection limits of lab equipment.
- NR (Not Reported):** laboratory analysis, usually Secondary Contaminants, not reported by water system. EPA recommends that secondary standards be reported but does not require systems to comply.
- Parts per billion (ppb) or Micrograms per liter (µg/l):** corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- Parts per million (ppm) or Milligrams per liter (mg/l):** corresponds to one minute in two years or a single penny in \$10,000.
- Parts per quadrillion (ppq) or Picograms per liter (picograms/l):** corresponds to one minute in 2,000,000,000 years, or a single penny in \$10,000,000,000,000.
- Parts per trillion (ppt) or Nanograms per liter (nanograms/l):** corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.
- Picocuries per liter (pCi/L):** a measure of the radioactivity in water.
- Regulated Contaminants:** contaminants for which the EPA has established drinking water standards.
- Running Annual Average (RAA):** yearly average of all the DPB results at each specific sampling site in the distribution system. The RAA, along with a range, is reported in the Table of Detected Contaminants.
- Standard Units (S.U.):** pH of water measures the water's balances of acids and bases and is affected by temperature and carbon dioxide gas. Water with less than 6.5 could be acidic, soft, and corrosive. A pH greater than 8.5 could indicate that the water is hard.
- Treatment Technique (TT):** a required process intended to reduce the level of a contaminant in drinking water.
- Unregulated Contaminants:** contaminants for which the EPA has not established drinking water standards.
- Variances & Exemptions (V&E):** State or EPA permission not to meet an MCL or a treatment technique under certain conditions.

NEWS SPECIAL

Below is a table of contaminants for which we monitor, if required, on a schedule set by the Environmental Protection Agency and the Alabama Department of Environmental Management.

STANDARD LIST OF PRIMARY DRINKING WATER CONTAMINANTS							
Contaminant	MCL	Unit of Msmt	Detections	Contaminant	MCL	Unit of Msmt	Detections
Bacteriological Contaminants				1,1-Dichloroethylene	7	ppb	ND
Total Coliform Bacteria	<5%	Present or absent	absent	cis-1,2-Dichloroethylene	70	ppb	ND
Fecal Coliform and E. coli	0	Present or absent	absent	trans-1,2-Dichloroethylene	100	ppb	ND
Turbidity	TT	NTU	0.15	Dichloromethane	5	ppb	ND
Cryptosporidium	TT	Calc. organisms/l	N/A	1,2-Dichloropropane	5	ppb	ND
Radiological Contaminants				Di (2-ethylhexyl)adipate	400	ppb	ND
Beta/Photon emitters	4	mrem/yr	ND	Di (2-ethylhexyl)phthalate	6	ppb	ND
Alpha emitters	15	pCi/l	Avg. 1.67	Dinoseb	7	ppb	ND
Combined radium	5	pCi/l	Avg. 0.54	Dioxin [2,3,7,8-TCDD]	30	ppq	ND
Uranium	30	pCi/l	ND	Diquat	20	ppb	ND
Inorganic Chemicals				Endothall	100	ppb	ND
Antimony	6	ppb	ND	Endrin	2	ppb	ND
Arsenic	10	ppb	ND	Epichlorohydrin	TT	TT	ND
Asbestos	7	MFL	ND	Ethylbenzene	700	ppb	ND
Barium	2	ppm	0.06	Ethylene dibromide	50	ppt	ND
Beryllium	4	ppb	ND	Glyphosate	700	ppb	ND
Cadmium	5	ppb	ND	Heptachlor	400	ppt	ND
Chromium	100	ppb	ND	Heptachlor epoxide	200	ppt	ND
Copper	AL=1.3	ppm	0.0049-0.13	Hexachlorobenzene	1	ppb	ND
Cyanide	200	ppb	ND	Hexachlorocyclopentadiene	50	ppb	ND
Fluoride	4	ppm	ND	Lindane	200	ppt	ND
Lead	AL=15	ppb	ND-0.0012	Methoxychlor	40	ppb	ND
Mercury	2	ppb	ND	Oxamyl [Vydate]	200	ppb	ND
Nitrate	10	ppm	0.22-0.37	Polychlorinated biphenyls	0.5	ppb	ND
Nitrite	1	ppm	ND	Pentachlorophenol	1	ppb	ND
Selenium	.05	ppm	ND	Picloram	500	ppb	ND
Thallium	.002	ppm	ND	Simazine	4	ppb	ND
Organic Contaminants				Styrene	100	ppb	ND
2,4-D	70	ppb	ND	Tetrachloroethylene	5	ppb	ND
Acrylamide	TT	TT	ND	Toluene	1	ppm	ND
Alachlor	2	ppb	ND	Toxaphene	3	ppb	ND
Benzene	5	ppb	ND	2,4,5-TP(Silvex)	50	ppb	ND
Benzo(a)pyrene [PAHs]	200	ppt	ND	1,2,4-Trichlorobenzene	.07	ppm	ND
Carbofuran	40	ppb	ND	1,1,1-Trichloroethane	200	ppb	ND
Carbon tetrachloride	5	ppb	ND	1,1,2-Trichloroethane	5	ppb	ND
Chlordane	2	ppb	ND	Trichloroethylene	5	ppb	ND
Chlorobenzene	100	ppb	ND	Vinyl Chloride	2	ppb	ND
Dalapon	200	ppb	ND	Xylenes	10	ppm	ND
Dibromochloropropane	200	ppt	ND	Disinfection Byproducts			
1,2-Dichlorobenzene	1000	ppb	ND	THM [Total trihalomethanes]	80	ppb	ND-7.5
1,4-Dichlorobenzene (para)	75	ppb	ND	HAA5 [Total haloacetic acids]	60	ppb	ND-1.2
o-Dichlorobenzene	600	ppb	ND				
1,2-Dichloroethane	5	ppb	ND				
LIST OF SECONDARY CONTAMINANTS							
Alkalinity, Total (as CA, CO ₃)	Copper	Manganese	Specific Conductance				
Aluminum	Corrosivity	Odor	Sulfate				
Calcium, as Ca	Foaming agents (MBAS)	Nickel	Total Dissolved Solids				
Carbon Dioxide	Hardness	pH	Zinc				
Chloride	Iron	Silver					
Color	Magnesium	Sodium					
LIST OF UNREGULATED CONTAMINANTS							
Aldicarb	Carbaryl	Dichlorodifluoromethane	1-Naphthol				
Aldicarb Sulfone	Chloroethane	Dieldrin	Paraquat				
Aldicarb Sulfoxide	Chloroform	Hexachlorobutadiene	Propachlor				
Aldrin	Chloromethane	3-Hydroxycarbofuran	N-Propylbenzene				
Bromoacetic Acid	O-Chlorotoluene	Isopropylbenzene	1,1,1,2-Tetrachloroethane				
Bromobenzene	P-Chlorotoluene	p-Isopropyltoluene	1,1,2,2-Tetrachloroethane				
Bromochloromethane	Dibromochloromethane	M-Dichlorobenzene	Tetrachloroethene				
Bromodichloromethane	Dibromomethane	Methomyl	Trichloroacetic Acid				
Bromofom	1,1-Dichloroethane	Methylene chloride	1,2,3-Trichlorobenzene				
Bromomethane	1,3-Dichloropropane	Methyl tert-butyl ether	Trichloroethene				
Butachlor	2,2-Dichloropropane	Metolachlor	Trichlorofluoromethane				
N-Butylbenzene	1,1-Dichloropropene	Metribuzin	1,2,3-Trichloropropane				
Sec-Butylbenzene	1,3-Dichloropropene	MTBE	1,2,4-Trimethylbenzene				
Tert - Butylbenzene	Dicamba	Naphthalene	1,3,5-Trimethylbenzene

Kids Derby Returns to Bibb County Lake for a Full Day of Fishing and Family Fun

BY SAVANNAH LOGAN
REPORTER

A favorite local tradition is making its return this spring, and it's shaping up to be a full day of simple, outdoor fun for families across the community. Five Hooks Bait and Tackle will host the 2026 Kids Derby at Bibb County Lake on Saturday, May 23, inviting young anglers ages 1 to 15 to cast a line and enjoy a day by the water.

The event will run from sunrise to sunset, giving families plenty of time to come and go, settle in, and make a day of it. Whether it's a child's first time holding a fishing pole or a yearly tradition they look forward to, the derby offers a relaxed and welcoming environment where everyone can participate.

Fishing and prizes will be part of the fun throughout the day, adding just enough friendly excitement without taking away from the laid-back at-

mosphere that makes events like this so enjoyable. It's less about competition and more about creating memories, though a good catch never hurts.

There will also be plenty to keep everyone fueled and refreshed. Veterans Café will be on site serving food, while The Junk Spot will offer drinks, fresh squeezed lemonade, dirty sodas, and a variety of sweet treats. Add in giveaways and a few surprises along the way, and it's easy to see why this event has become a community favorite.

At its heart, the Kids Derby is about bringing people together, families, friends, and neighbors, around something simple and meaningful. A fishing pole, a little patience, and a good stretch of time outdoors can go a long way.

For those looking for an easy way to spend a spring Saturday, this is one worth circling on the calendar.

BMC HEALTH AND WELLNESS CORNER

FARMERS MARKET

The BMC Farmers Market is almost here!

We're excited to announce that our Farmers Market opens May 6th and will be held every Wednesday from 2:00pm to 6:00pm!

Come shop fresh, local produce, handmade goods, and more. It's the perfect midweek stop to support local and stock up on goodness.

Interested in becoming a vendor?
Contact bibbwellness@gmail.com

BMC WELLNESS CENTER

SCHOLARSHIP APPLICATIONS

During the month of May, families may apply for assistance toward Flag Football and all Summer Camps. We encourage families to apply early to take advantage of available opportunities and secure placement in upcoming programs. Learn more at bmcwellness.com/youthprograms.

FLAG FOOTBALL

Registration opens May 11th

The number one reason families choose NFL FLAG is simple: it's fun. The no-contact format and team-centered approach make it easy for kids to play without the stress or risk of tackle football, while still enjoying all the excitement of the game. bmcwellness.com/flagfootball

SUMMER CAMP

Campers can expect a mix of skill-building drills, team games, and friendly competitions that help them improve their abilities while staying active. Beyond sports, we focus on building confidence, teaching sportsmanship, and encouraging friendships that last beyond the summer. bmcwellness.com/summercamps

BMC APRIL EMPLOYEE OF THE MONTH

Phillip "Buck" Cunningham

Buck has been a valued employee of Bibb Medical Center since July 2007, serving as a Maintenance Technician. What he enjoys most about working at BMC is being part of a great crew and getting to connect with residents, hearing their stories along the way.

Buck was drawn to this career path through his enjoyment of fixing things and problem-solving, bringing those skills to his role each day.

Outside of work, Buck enjoys hunting and fishing.

REGISTERED VOTER POLL LOCATOR

Where to Vote on May 19th!

Special Section B of the Centreville Press is provided this week as a supplemental list to the one published April 24, 2026.

We at the Centreville Press would like to thank our readers for their continued support, and would like to encourage everyone to get out and vote!

- The staff of the Centreville Press

Instructions:

- Step 1: Find your name on the list in the following pages (sorted alphabetically by last name).
- Step 2: Find the number to the right of your name.
- Step 3: Locate that number on the list of poll locations below to find your polling place.
- Step 4: GO VOTE!

Polling Place #	Polling Place	Address
100	GREENPOND FIRE DEPARTMENT	19639 EASTERN VALLEY ROAD WOODSTOCK AL 35188
200	ALTERNATIVE SCHOOL	456 CAHABA RIVER DRIVE WEST BLOCTON AL 35184
300	EOLINE FIRE DEPT	6480 HWY 82 WEST CENTREVILLE AL 35042
400	BRENT CITY HALL	22 1ST STREET BRENT AL 35034
500	ROCK BUILDING	157 S.W. DAVIDSON DRIVE CENTREVILLE AL 35042
600	SIX MILE COMMUNITY CENTER	100 SIX MILE SCHOOL RD CENTREVILLE AL 35042
700	LAWLEY COMMUNITY CENTER	2971 HIGHWAY 36 LAWLEY AL 36793
